

HYBRID SUNFLOWER

ASSH-222

- Medium Duration & Medium Height
- Large Convex Head with Good central filling & High Oil Percent (42-45)
- Bold & Black seed with white strips
- Tolerant to Alternaria, DM & Necrosis Disease
- Wider adoptable to all sunflower growing areas
- Excellent Yield Potential.

HYBRID PADDY

SUVARNA 204

- Semi Dwarf & Non Lodging
- Medium- Early (125-130 Days) Segment
- More Number Of Productive Tillers
- Complete Panicle exertion
- White & attractive long slender grains
- Non sticky rice & Good cooking quality upon ageing
- Yield potential is Good under well managed conditions
- Tolerant to BLB, BHP & Blast

HYBRID PADDY

SINDHU (CRHR-32)

- Erect, Medium Tall & Non Lodging
- Medium Maturity (140-145 Days) Segment
- More Number Of Productive Tillers
- Complete Panicle exertion
- Good Cooking Quality
- Non Aromatic & Medium slender Grain
- Suitable to Irrigated & Shallow land of Coastal Area
- Tolerant to BLB, BHP, Blast & Water logging

RES. PADDY

SAMPADA

- High Yield Potential
- Short Duration (Kharif 115-120 Days & Rabi 125 Days)
- Dwarf Plant, Erect & Dark foliage
- Very strong Culm & Non Lodging
- Very fine, Slender Grain
- More number of filled Grain per Panicle
- Non Shattering, High Milling Recovery
- Tasty & Good Cooking quality
- Suitable to Both the Season (Kharif & Rabi)
- Due to Short duration, Suit to less water available area
- Cold Tolerant Variety & Tolerant to BPH under less N application Tolerant to Blast & Neck Blast diseases.

RES. PADDY

JAI SRI KRISHNA

- Duration 145-150 Days
- Dwarf Plant, Dark foliage
- Very strong Culm & Non Lodging
- Super fine Medium Slender Grain
- Compact Panicle & more filled Grain per Panicle
- High Milling Recovery
- Tasty & Good Cooking quality
- Suitable to Both the Season (Kharif & Rabi)
- High Yield Potential
- Tolerant to Blast & Neck Blast & Brown spot diseases.

RES. PADDY

APU 10

- High Yield Potential
- Short Duration (120 Days) & Medium Tall
- Semi Compact, Erect & Dark foliage
- Very strong Culm & Non Lodging
- Coarse & Long Slender Grain
- High Test weight (1000 Seed weight 28 g)
- Very High filled Grain per Panicle (Less Chaffy Seeds)
- Non Shattering, High Milling Recovery
- Suitable to Both the Season (Kharif & Rabi)
- Due to Short duration, Suit to less water available area
- Tolerant to BPH & BLP and Leaf Blast & Brown spot diseases.

RES. PADDY

ADITYA

- Duration (135-150 Days in Rabi) & Medium Tall
- Broad leaf & Dark foliage
- Very strong Culm & Non Lodging
- Medium slender fine grain
- More Grains per Panicle (Close grain in Panicle)
- Non Shattering, High Milling Recovery
- Suitable to Both the Season (Kharif is very much suitable)
- Tolerant to BPH & BLP

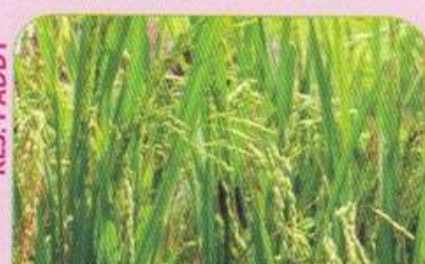

RES. PADDY

SURAJ

- Duration - 120 Days-Kharif & 135 Days-Rabi
- Semi Dwarf, Compact, Erect Flag Leaf
- Medium Tillering & Dark foliage
- Medium Bold Coarse Grain
- Non Shattering of Grain at Maturity
- High Milling Recovery
- Suitable to Both the Season (Orissa, AP, Telangana, MH, MP, Kerala)
- High Yield Potential
- Tolerant to BPH

RES. PADDY

GOURAVNATH

- Duration Kharif-120-125 Days & 140-150 Days in Rabi
- Dwarf Plant, Erect & Dark foliage
- Very strong Culm & Non Lodging
- Fine, Medium slender grain High Milling Recovery
- More number of filled grains per Panicle
- Tasty & Good Cooking quality
- Suitable to Both the Season (Even suitable to late kharif)
- High Yield Potential
- Tolerant to Blast & Neck Blast, Brown spot diseases.
- Tolerant to BPH
