Hy. BRINJAL

### PPL-7777

- Semi erect & compact plant habit
- Fruits are thin long cylindrical
- Shiny dark purple color fruits
- Solitary fruit bearing
- Calyx is green & non spiny
- Harvesting 52-58 DAT
- Fruit weight approx. 95-110 gms
- Excellent crop longevity & heat tolerance fruits
- Tolerant to Bacterial wilt

Hy. BRINJAL

### RANJITHA

- Vigorous, Bushy type Plant
- First Picking starts from 60-65 days after transplanting
- Non Spiny Calyx with Green Color
- Medium long, cylindrical Pink Color Fruits with Prolific Fruit bearing
- Average fruit weight is 150-200 g
- Very Good keeping quality & less seed content

Hy. Capsicum

### INDRANI

- Medium early maturing hybrid.
- Days to 1st picking 75-80 DAT.
- Highly vigorous plant.
- Fruits are blocky & dark greenish.
- Fruits are smooth & firm wall with 3-4 lobes.
- Average fruit weight: 200-250 g.
- Excellent yielder.
- Duration 150-160 days.
- Excellent keeping quality

Hy. BRINJAL

### UJWALA

- Erect & non spiny plant habit
- Fruits are Large Round & Bright purple colour
- Fruit weight approx. 250-300g
- Solitary fruit bearing
- Calyx is green with purple tinge & non spiny
- Low seed content in fruits
- Harvesting 52-58 DAT
- Excellent Yield potential
- Tolerant to Downey mildew

Hy. BRINJAL

### PREETHI

- Semi erect & Bushy type
- Days to 1st fruit picking 50-55 DAT
- Oval round (Chu-Chu type) pinkish fruits
- Calyx is green & non spiny
- Fruit weight 50-60 g
- High yielder & cluster bearing
- Good for stuffing (Chu-Chu type)
- Tolerant to sucking pest
- Tolerant to high temp upto 40°C
- Good for long transportation

Hy. BRINJAL

### HARSHITA (GLBH-99)

- Plants are Strong, tall & erect
- Green colour long cylindrical fruits
- Calyx colour is green & non spiny
- Good cooking quality & cluster bearing
- Popular in southern & eastern India
- Harvesting 50-60 DAT
- Fruit weight approx. 100-110 g
- Tolerant to Bacterial wilt

Hy. CUCUMBER

### HIMA

- Vigorous vines with dense foliage
- Light Green fruits
- Fruits length 18-20 cm & 15 Cm Girth with 400-500 g weight
- Fruits are Cylindrical in Shape with very good taste
- Fruits are firm and crispy with good shelf life
- Harvesting starts from 40-45 days after Planting
- Less Bitterness Fruits
