

Res. Sesamum

SHESHU

- Height 110-120 Cm
- Quadrangular type Plants & Leaves are Dark green
- Capsule densely arranged in cluster
- 3 Capsules / axil & 4 loculed
- Seeds are White & Bold in Size
- Oil % - 51
- Maturity: 95-100 days
- Suitable to Telangana region

Res. Cow Pea

JANSI

- Plants are Spreading & Semi viny growth
- Dense foliage with big leaves
- Pods are cylindrical long, light green color at marketable stage
- Number of Pods / cluster: 2-3
- Medium size seeds with white color along with purple patch
- Maturity 55-60 DAS
- It has high yield potential
- Suitable for both Kharif & summer
- Suitable to ready to market & Long transportation

Res. Beans

AASHA

- Indeterminate Plant habit
- Pods are Uniformity in shape & size
- Attractive green fruits
- Pod Length : 15-20 Cm
- Seeds Medium size & Purple in Color
- Maturity: 40-45 days after sowing
- High Yielding Variety
- Suitable for Kharif, mild winter season

Res. Cow Pea

INDRAJA

- Dwarf and bush type (height 50-60 cm), Photo-insensitive
- Early flowering (40-45 DAS) & early picking (50-55 DAS)
- Suitable for both spring-summer and rainy seasons
- Pods are 30-35 cm long, dark green,
- Pods are soft, fleshy & free from parchment
- Seed color is Red
- Green pod yield potential is very excellent
- Resistant to golden mosaic virus

Res. Cow Pea

WHITE

- Erect Bush type Plant
- Long slender pod bearing in cluster
- Medium size seed & Creamy white color
- Attractive light green pod with 18-20 Cm
- 1st Picking in Kharif: 40-45
- High yielding potential
- Suitable for both Table & Seed purpose
- Suitable for both spring-summer and rainy seasons

Res. Beans

KAMINI

- Plant Type Strong & bushy type
- More Number of Attractive green fruits per Plant
- Fruit Shape / Skin Attractive slender smooth pod
- Pod Color Bright dark green & Pod Size 13 to 15 Cm
- Seeds Medium size & Purple in Color
- Maturity / Picking 40 to 45 DAS
- High Yielding Variety

Res. Yard Long Bean

SUMA-7

- Indeterminate Plant & twining habit
- 1st Flowering starts from 40-45 DAS
- Harvest: 75 days after sowing.
- Pods are 55-60 Cm & Light green color
- Pods are Tender, Fleshy & Sweet in taste
- High yield Potential
- Suitable for Kharif, mild winter season

Res. Dolichos

TIGER

- Growth Habit: Semi-Determinant
- Days to 1st picking: 75-80 Rabi
- Pod length: 10-12 Cm
- Pod quality: Long, Round, Greenish White Pod
- Seeds are Purple Color
- Special Features:
- Attractive Greenish white round pod
- Excellent keeping quality
- Excellent Taste
- Tolerant to Biotic & Abiotic stress.

Res. Cluster Beans

PNB (PUSA NAVA BAHAR)

- Non Branched Single stem plant with 100 cm height
- Erect Plant type with profuse bearing of pods in bunches
- Pods are thin long & light green color
- Pods are tender, smooth & glassy
- Pods 12-14 cm long, 9-10 pods/cluster & 30-35 cluster / plant
- First picking 45-54 DAS
- Suitable for long distance transport
